Year: 1996 1998 2000 2002

The table with data and detailed explanations and sources are provided below the chart.

YEMEN

Comparison between 2004, 2002 (top-bottom order)

Source: [Kaufmann D., A. Kraay, and M. Mastruzzi 2005: Governance Matters IV: Governance Indicators for 1996-2004.](#)

Note: The governance indicators presented here reflect the statistical compilation of responses on the quality of governance given by a large number of enterprise, citizen and expert survey respondents in industrial and developing countries, as reported by a number of survey institutes, think tanks, non-governmental organizations, and international organizations. The aggregate indicators in no way reflect the official position of the World Bank, its Executive Directors, or the countries they represent. As discussed in detail in the accompanying papers, countries' relative positions on these indicators are subject to margins of error that are clearly indicated. Consequently, precise country rankings should not be inferred from this data.

To download the above chart, [click here](#). Save the file to your hard disk and then insert it into the program of your choice (Word, Powerpoint, etc.), using **Insert->Picture** command. If you want to copy the table below, select it with the mouse and then simply copy and paste it into the program of your choice.

The above chart depicts the percentile rank on each governance indicator. Percentile rank indicates the percentage of countries worldwide that rate below the selected country (subject to margin of error). Selected comparator (if any) is depicted by the lower bar for each governance indicator. In the Bar Chart, the statistically likely range of the governance indicator is shown as a thin black line. For instance, a bar of length 75% with the thin black lines extending from 60% to 85% has the following interpretation: an estimated 75% of the countries rate worse and an estimated 25% of the countries rate better than the country of choice. However, at the 90% confidence level, only 60% of the countries rate worse, while only 15% of the countries rate better. Higher values imply better governance ratings. Each chart color pattern follows a simple quartile distribution (for illustrative purposes): the best quartile (over 75th percentile) is in green (with top 10th colored in darker green), the second best (over 50th) is in yellow, the third (over 25th) is in orange, and the fourth is in red (with bottom 10th in darker red). Note that this simple color coding does not account for the size of the confidence intervals; it is based solely on the point estimates for mapping into quartiles.

Statistical Table: all 6 governance indicators for YEMEN

| Governance Indicator | Year | Percentile Rank (0-100) | Estimate (-2.5 to + 2.5) | Standard Deviation | Number of surveys/polls | Sources |
|--------------------------|------|-------------------------|--------------------------|--------------------|-------------------------|----------------------|
| Voice and Accountability | 2004 | 22.8 | -0.99 | 0.14 | 9 | List |
| | 2002 | 21.2 | -0.88 | 0.17 | 7 | List |
| Political Stability | 2004 | 7.3 | -1.48 | 0.24 | 7 | List |
| | 2002 | 13.0 | -1.40 | 0.24 | 6 | List |
| Government Effectiveness | 2004 | 20.7 | -0.84 | 0.19 | 8 | List |
| | 2002 | 17.9 | -0.84 | 0.18 | 7 | List |
| Regulatory Quality | 2004 | 14.8 | -1.04 | 0.20 | 7 | List |
| | 2002 | 27.6 | -0.61 | 0.19 | 6 | List |
| Rule of Law | 2004 | 12.1 | -1.11 | 0.14 | 11 | List |
| | 2002 | 7.7 | -1.23 | 0.16 | 9 | List |
| Control of Corruption | 2004 | 22.7 | -0.84 | 0.16 | 8 | List |
| | 2002 | 32.7 | -0.70 | 0.18 | 7 | List |
